Deputy Director Steven Walsh, PE

Bob Cassilly, Harford County Executive

# WHEN IT SNOWS...

Roads are pre-treated with a salt and water mixture that helps melt snow. When the snow starts, we begin with salt, then plow when snow is 1" or deeper. Emergency routes come first, then main roads, then secondary roads and courts.

## HOW LONG DOES IT TAKE

to treat a road at least once?

It depends how much it snows.

\*From when the snow ends

Look for our snowplow tracker to be activated in major storms.

## HOW CAN YOU HELP?

- 1 | Park in your driveway.
- 2 | No driveway? Park on the same side of the street: even-numbered side in even years and odd-numbered side in odd years. Avoid parking in courts so plows can maneuver within them.
- 3 | Our job is to clear county roads; we cannot plow driveways. To avoid having snow pushed back in your driveway, face the road and place shoveled snow to your right in the yard. Shovel the end of your driveway after plows have pushed snow curb to curb on your street.
