BUFFER MANAGEMENT PLAN
Please attach site plan.

Ref: Harvest Permit # _____

Property Owner _____
Address of Property _____
Size of Property _____ square feet/acres
Total disturbed area _____ square feet/acres

Site Conditions (Please attach map)

Area in buffer	
Average slope of land to watercourse (percent)	
Average width of buffer on each side of watercourse (feet)	
Present stand density (average basal area per acre)	
Tree species composition (List species and percentage of total stand density):	
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
Is buffer even-aged or uneven-aged?	
What is dominant size class?	
Is competition in the understory light, moderate or severe?	
How large is the watershed drainage area (in acres)?	
Reasons for removing vegetation in the buffer:	

Canopy trees to be removed	
Understory trees to be removed	
Amount of basal area being harvested (sq. ft. per acre)	
Amount of basal area to remain (sq. ft. per acre)	
How many stream crossings are planned?	
Will the next stand be predominately advanced reproduction, seed tree or seedling stock?	
Site preparation methods to be utilized?	
Will control of the understory or vegetation be necessary to successfully establish desirable regeneration?	
Follow-up work needed? If so, please describe:
